

Joe Hughes

Email: joe@joeughes.org

Highly technical engineer, team builder, problem solver, coach.

I am open to opportunities that scare me.

Experience

Delivery Lead

GfK; August 2019 - Present

Accountable for feature release cadence, risk management, removing blockers and fixing processes

- Continuous evaluation of work streams, people and team allocation
- Pairing / Mobbing with Devs, QAs, DevOps to unblock and enable engineers
- Enabling UI/UX, product owners, scrum masters to work with developers and solve the right problems for our clients
- Remove processes that add no value
- Create problem solving environments and remove unnecessary noise
- Increase collaboration by breaking silos, often by physically moving people and working through problems together

Principal Quality Engineer

GfK; July 2018 - August 2019

- Hiring new quality engineers as the project scaled
- Leading by example, working within one or more development squads. Delivering products that our customers love
- Building clean, reusable frameworks and enabling developers to own the quality of their deliverables
- Pairing with Developers, all day, everyday
- Crafting generic component and system CI/CD pipelines
- Running local and global communities of practice
- Coaching other quality engineers
